Features

SANYO: Your Best Choice in Ductless Split Air Conditioning Systems

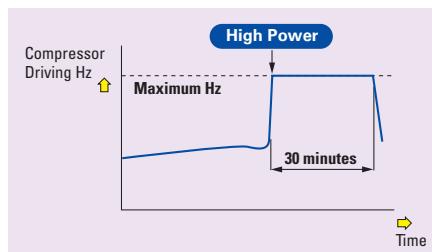

Sanyo's Ductless Split Air Conditioner & Heat Pump products offer wide versatility in solving your cooling and heating requirements. The Indoor unit (evaporator) is mounted inside the room, enclosed in a handsome space saving cabinet. It is connected to the outdoor unit (condenser) via refrigerant lines & inter-unit wiring through a 3-1/2" opening in the wall. Since no ductwork is required, installation is simple, fast & efficient. There is no need to use up window space or cut large openings in existing walls, which could undermine the integrity of your structure, and even pose security risks. Since the Rotary compressor is located in the outdoor unit, compressor operating noise is virtually eliminated from the indoor. The indoor unit has been uniquely designed to provide Whisper Quiet operation while delivering comfort throughout the room (s).

In addition, rotary compressors provide efficient, powerful cooling at the lowest noise levels in the industry.

DC INVERTER is outstanding for it's RAPID COOLING & HEATING POWER. As soon as the temperature is reached, it automatically adjusts current frequency temperature fluctuation. It also provides "ENERGY-SAVING" (which saves your electricity charges) as well as "QUIETER OPERATION".

■ High Power Mode

The unit operates at maximum capacity by pressing a High Power button.

■ Energy-Saving Operation

The DC Inverter Air Conditioner affords continuous operation, while it adjusts capacity according to the room temperature. The accurate sensing of cooling or heating loads prevents frequent changes in capacity and ensures efficient, economical operation.

■ Quiet Operation

The DC Inverter Air Conditioner uses a twin rotary compressor. Compared to the conventional single cylinder type, the twin rotary compressor dramatically reduces vibration and noise during operation, thus ensuring quiet operation.

■ High SEER

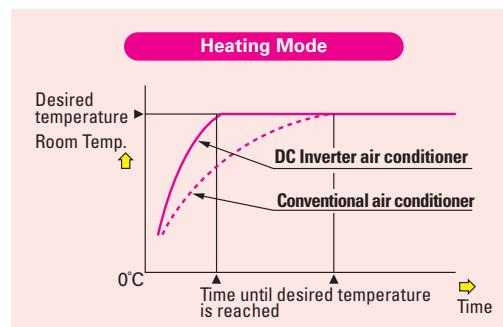

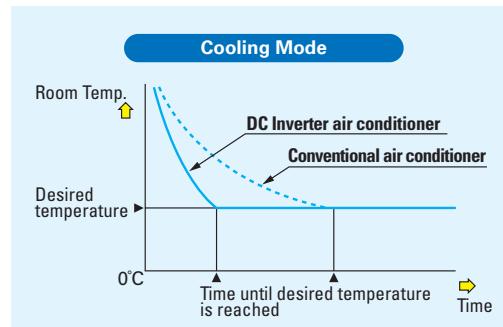

With the integration of inverter technology and R-410A refrigerant, our products meet the DOE of a minimum requirement of 13 SEER.

■ R-410A

ODP (Ozone Depletion Potential) = 0 of HFC refrigerant is used.

■ Rapid Cooling and Heating

Since the DC Inverter Air Conditioner has efficient rapid heating and cooling capacity produced by variable compressor rotation speed, it ensures quicker control of room temperatures than conventional air conditioners.

All Sanyo units are conduit connectable for more safety.

Features

Microprocessor-Controlled Operation

Microprocessor control ensures that the temperature and humidity levels in the room are always comfortable.

Wireless Remote Control

Sanyo's infrared Remote Control with and easy to read LCD Display, gives the user the capability to adjust & set: temperature, sweep (louver control), fan speeds, timer, night setback and more, for complete automatic operation.

Dry Mode

By coupling compressor and fan operation, intermittent operation can be precisely controlled according to room temperature, so that air is efficiently dehumidified.

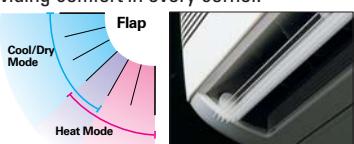

3 Fan Speeds and Automatic Fan Operation

Convenient microprocessor control automatically adjusts fan speed to High, Medium or Low. According to room temperature to maintain a comfortable airflow throughout the room.

Air Sweep Control

The air sweep function moves the louver up and down in the air outlet, directing air in a "sweeping" motion around the room and providing comfort in every corner.

Louver Control

Louver can be manually set to the desired angle by remote control.

Negative Ions Generator

The abundance of negative ions is found near waterfalls and forests. The negative ions generator fills your room with negative ions throughout the year.

*Ion generating power - over 100,000 parts/cc

Automatic Heating and Cooling Changeover

After setting the temperature and functions you desire, just relax. If the room temperature is higher than the set temperature, cooling operation begins. If the room temperature is lower than the set temperature, heating operation begins. During normal thermostat cycle operation, cooling and heating operations automatically change in accordance with set temperature, time and room temperature. (Heat Pump unit only)

1-hour OFF Timer

When this button is pushed either while the unit is operating or while it is stopped, the unit will operate for one hour and then switch off automatically.

12-hour ON/OFF Timer

This timer can be set to automatically turn the unit on or off at any time within a 12-hour period.

24-hour Clock with ON/OFF Program Timer

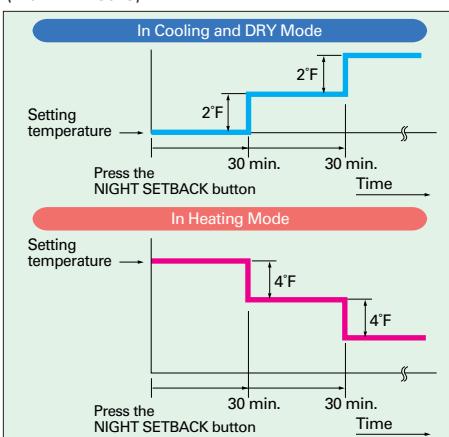

The remote control unit allows you to set a wide variety of timer-based operations. Such functions include automatic ON/OFF with a timer setting, same time ON/OFF every day, ON timer, OFF timer and Combination timer.

ON/OFF Timer

Remote controller

ON/OFF timer can be set to 0.5 hour gradations (max. 72 hours).

Night Setback Mode for Cooling and Heating

Cooling and DRY Mode: With the Night Setback Mode, the air conditioner automatically raises the setting temperature 2°F after 30 minutes, and then another 2°F after the next 30 minutes.

Heating Mode: With the Night Setback Mode, the setting temperature is automatically lowered 4°F after 30 minutes, and then another 4°F after the next 30 minutes. This saves energy without sacrificing comfort and is ideal for gentle cooling and heating.

Automatic Restart Function after Power Failure

This feature allows the system to automatically resume operation at its preset program, after power is restored from a power failure.

Hot Start Heating System

Right from the start, air is warm and comfortable. The Hot Start Heating System prevents any cold blasts at the beginning while the heat pump is warming up. (Heat pump unit only)

Air Clean Apatite Filter

Apatite or calcium phosphate is highly effective in trapping germs, mites and mite excrement, pollen, dirt and dust, and cigarette odor. The triple layered air clean apatite filter consists of antibacterial, deodorizing, and dust-collecting sections that maintain healthy, clean air in your room.

Anti-Mold Filter

Filter is treated with anti-mold chemicals to prevent mold or bacteria from occurring.

Built-In Drain Pump

Max. head 30 inches¹ from the bottom of the unit. (condensate pump is only for allowing drain line to meet minimum gravity flow requirements.)

Electric Refrigerant Control Valve

The circulation volume of the refrigerant is controlled by a pulse type electric control valve. In order to attain optimum efficiency, when the power is switched ON, the opening degree of the electric control valve is controlled between 90 and 480 steps. (Ceiling Recessed Models only.)

Additional Features

Filter Sign

Filter sign informs you when filter maintenance is necessary.

2,500 hrs: X, T-types 150 hrs: K-type

(RCS-TM80BG)

Self-Diagnosing Function

Details of previous warnings are stored and can be verified on the liquid crystal display. This makes it easier to diagnose malfunctions, greatly reducing service labor. (Wired remote controller)

(RCS-TM80BG)

Additional Features

Wired Remote Controllers (Optional) over 26000 Btu, Except 24KS62R / 24KLS62R

Timer Remote Controller (RCS-TM80BG)

Basic remote controller ON/OFF

- Operation mode changeover (Cooling, Heating, Dry, Auto, Fan.)
- Temperature setting (Cooling/Dry: 64°F-86°F Heating: 61°F-86°F)
- Air volume adjustment (HH, H, LL, Auto.)
- Air flow direction adjustment.

Time Function

- 24 hours real time clock.
- Day of the week indicator.

Weekly Program Function

- A maximum of 6 actions can be programmed for each day.

Unoccupied Function

- Allows the temperature of the conditioned space to be preset to a desired temperature, which will be maintained until manually changed. This feature is initiated by pressing the symbol then setting the temperature by using the up or down arrows on the control. This provides a method of maintaining room temperature while at work or away on vacation, etc.

Sleeping Function

- This function controls the room temperature for comfortable sleeping.

Max. 8 indoor units can be controlled from one remote controller.

Remote control by main remote controller and sub controller is possible.

- Max. 2 remote controller (main remote controller and sub controller) can be installed for one indoor unit.

System Controller (SHA-KC64UG)

• Used in combination with remote controllers, the system controller can control up to 64 groups of indoor units (max. 64 indoor units).

- Separating the 64 indoor units into 4 zones, each zone can be controlled individually.
- Up to 16 groups (indoor units) can be registered to each zone.
- Collective control and individual group (unit) control can also be performed.
- System without remote controller is also available.
- Up to 2 system controllers (1 main, 1 sub) can be installed in a system.
- Alarm and operation outputs for an external collected signal are available (potential free contact).

Wireless Remote Controllers (Optional) over 26000 Btu, Except 24KS62R / 24KLS62R

If you use both remote controller and system controller concurrently, both controllers can be used on a last-signal priority basis.

INVERTER Multi-System "Flexi-Multi"

Fits with Various Sizes of Room and Life Style

The multi-system type allows a single outdoor unit to be connected to 2 to 4 indoor units. It also solves the problem of limited installation space and does not clutter the exterior of your home.

Refrigerant	Narrow Tube inch	1/4" x 4"	1/4" x 3"	
Tube Diameter	Wide Tube inch	3/8" x 2" / 1/2" x 1" / 5/8" x 1"	3/8" x 2" / 1/2" x 1" / 5/8" x 1"	
Dimensions & Weight				
Unit Dimensions	H x W x D inch	29" 1/8" x 35" 1/2" x 12" 5/8"	29" 1/8" x 35" 1/2" x 12" 5/8"	
Net Weight	Lbs			

IMPORTANT

It is not possible to connect an outdoor unit to only a single indoor unit. If operated with only ONE indoor unit installed, the returning refrigerant to the compressor may cause a malfunction.

Connectable from 2 to 4 Indoor Units

Up to **4**
Rooms

CM3172 / CLM3172

CMH3172

Model No.	Outdoor Unit	CM3172 / CLM3172	CMH3172	
Performance		Cooling	Cooling	Heating
Capacity	Btu/h	30,600	30,600	32,000
Air Circulation (High)	m³/h	1,940		
Number of Connectable Indoor Units		2 ~ 4		2 ~ 4
SEER	Cooling	13		13
HSPF	Heating	-		7.7
Electrical Rating				
Power Supply	V, Phase, Hz	230V / 208V, 1Ph, 60Hz	230V / 208V, 1Ph, 60Hz	
Running Ampere	A	11.70 / 12.90	11.70 / 12.90	9.70 / 10.70
Power Input	W	2,660 / 2,660	2,660 / 2,660	2,210 / 2,210
Features				
Controls		Microprocessor	Microprocessor	
Fan Speeds		Auto (Hi, Me, Lo)	Auto (Hi, Me, Lo)	
Compressor		DC Inverter	DC Inverter	
Refrigerant/Amount Charged at Shipment	g	R410A / -	R410A / -	
Refrigerant Control		Electric Expansion Valve	Electric Expansion Valve	
Operation Sound	Hi dB-A	53	53	52
Refrigerant Tubing Connections		Flare Type	Flare Type	
Max. Allowable Tubing Length per Unit	Ft	230	230	
Refrigerant	Narrow Tube inch	1/4" x 4"	1/4" x 3"	
Tube Diameter	Wide Tube inch	3/8" x 2" / 1/2" x 1" / 5/8" x 1"	3/8" x 2" / 1/2" x 1" / 5/8" x 1"	
Dimensions & Weight				
Unit Dimensions	H x W x D inch	35"-1/32" x 35"-1/2" x 12"-5/8"	35"-1/32" x 35"-1/2" x 12"-5/8"	
Net Weight	Lbs			

IMPORTANT

It is not possible to connect an outdoor unit to only a single indoor unit. If operated with only ONE indoor unit installed, the returning refrigerant to the compressor may cause a malfunction.
